

### Maths

Children will develop their understanding of how to handle decimals as fraction equivalents and to know how to apply knowledge to solve money. To apply their understanding of decimals and money to develop their mathematical reasoning and problem solving skills.

### English

As part of our focus on Robin Hood, we will be looking at the Legend of Robin Hood. We will explore different persuasive techniques; write letters and role play parts of the legend to aid our writing. We will also compare and contrast different versions of the Robin Hood story by different authors.

### Music

We will be learning A folk song on Robin Hood day.

### Computing

We will learn how use Excel to handle data and use equations.

### Science

We will be exploring all about sound and how sound travels. Children will find out about sound waves and vibration. Children will develop their own investigation skills.

## YEAR 4 TOPIC PLAN SPRING TERM 2 2017

### Art and Design

Using Henri Rousseau as inspiration, children will draw in the style of this wonderful artist.

### Physical Education

We will be participating in a range of OAA activities and learning the skills needed to outwit opponents using tactics and strategies.

### Geography

As we read Robin Hood we will be comparing where he lived to our local environment as well as knowing how to use a compass.

### Design an Technology

During our Robin Hood day children will have the opportunity to build the castles they have designed in the previous half term.

### Grammar, Spelling and Punctuation

Children will consolidate knowledge of what prepositions are, how apostrophes are used and using adverbial phrases and expanded noun phrases.
